PERSONAL PROJECTS

Obstacle Detector Robot
(04/2020-05/2020)
obstacle detector robot is an intelligent device which can automatically sense the obstacle in front of it and avoid them by turning itself.The robotic vehicle is designed to first track and avoid any kind of obstacles that comes it's way.

Pedometer Using Arduino
(02/2021-03/2021)
Pedometer are the device that only used to count footsteps.This Pedometer will count the number of footsteps and display them on a 16×2LCD module. This pedometer can be integrated with this arduino smart watch .

Smart Shopping Trolly
(08/2021-10/2021)
Smart shopping trolly with automated billing using Arduino this is a innovative project consists of an automated billing system which can be placed within the shopping trolly .this automated payment system consists of a RFID reader .

RFID Based Passport System
(Project Ongoing)
The project designed is an authentication system where the passport holder is authorized through RFID technology. The passport holder would have an RFID tag which contains all the passport details like name, number, nationality etc., if the data matches microcontroller displays an confirmation message otherwise displays a denial message on a LCD screen.

SKILLS

python | Java | C | Data base management system | Multi sim | Data Struture | Matlab

ACHIEVEMENTS

5-star python (basics) on HackerRank
- consistently participated in almost all coding program held on HackerRank

5-star problem solver on HackerRank
- consistently participated in almost all coding challanges held on HackerRank

Goggle Code jam secure 40 points
- Participated and secure 40 points in Round 1(A)

SOFTWARE

MATLAB, , Multi-Sim

MS-word, Excel, PowerPoint.

CERTIFICATES

Computer system security certified by IIT kanpur

Building arduino robot and devices certificate by coursera

Artificial intelligence certificate by Accenture

Python (basics) certification by Hackerrank

LANGUAGES

Hindi
Full Professional Proficiency

English
Full Professional Proficiency

INTERESTS

Data Struture | Digital System Degin
