parth-sarthi

Profile

Motivated and detail-oriented Engineer with a strong foundation in Linux, Microsoft Azure, Kubernetes, and system troubleshooting. Skilled in monitoring and maintaining cloud infrastructure, identifying and resolving system issues, and ensuring optimal performance. Proficient in Data Structures and Algorithms (DSA), with a problem-solving mindset and a keen interest in scalable and secure cloud solutions. Passionate about leveraging cloud technologies to build efficient, resilient systems and continuously enhance technical expertise.

Education

2025 – 2027
Noida, India

Master of Technology in Computer Science and Engineering
Galgotias University
GPA 8.68

2021 – 2025
Noida, India

Bachelor of Technology in Computer Science and Engineering
Galgotias University
GPA 8.58

2021
Etawah, India

Senior Secondary
Delhi Public School
Marks 89.60%

2019
Etawah, India

Higher Secondary
St. Mary's Inter College
Marks 89.00%

Professional Experience

Jul 2024 – Jun 2025
Gurugram, India

Cloud NOC Engineer Intern
Parametric Technology India Pvt. Ltd.

- Monitoring Systems: Regularly checking the health and performance of cloud services and infrastructure using various monitoring tools to preemptively catch and resolve issues.
- Incident Management: Investigating, troubleshooting, and responding to incidents. This includes identifying the root cause of issues and working with relevant teams or third parties to resolve them.
- Ticket Management: Handling tickets and requests from other departments, which can range from minor issues resolved within an hour to more complex problems that may take longer
- System Checks: Performing routine system checks to ensure all services are running efficiently and addressing any anomalies detected.
- Documentation: Maintaining detailed records of incidents, resolutions, and any changes made to the system to ensure a comprehensive knowledge base.
- Continuous Improvement: Identifying areas for improvement in processes and tools to enhance the efficiency and effectiveness of the NOC operations

Projects

Gesture-Based Interaction System
Computer Vision, Python

Autowise-Car Price Prediction
Python, Machine Learning

Skills
