Summary

Motivated MCA graduate with strong foundations in Computer Science subjects including Operating Systems, DBMS, Python Programming, Data Structures, and Object-Oriented Programming. Passionate about teaching, mentoring students through practical learning approaches. Seeking an Assistant Professor position in the Computer Science Department to contribute to academic excellence, student development, and research-oriented learning.

Education

Axis Colleges — Kanpur, UP
Master of Computer Application (MCA), CGPA: 8.31 — *2024 – 2026*

Dayanand Anglo-Vedic College — Kanpur, UP
Bachelor of Science (Computer Application) Score: 56.2% — *2020 – 2023*

Maharana Pratap Education Centre (12th, CBSE) — Kanpur, UP
Score: 82.8% — *2019 – 2020*

Maharana Pratap Education Centre (10th, CBSE) — Kanpur, UP
Score: 81.2% — *2017 – 2018*

Subject Expertise & Technical Skills

- **Core Computer Science Subjects:** Operating Systems, DBMS, Computer Networks, Software Engineering, DSA, OOP
- **Programming Languages:** Python, Java, SQL, Basic Machine Learning
- **Areas of Interest:** AI, Machine Learning

Experience

Academic Mentor | *Student Council Services (SCS)* | *DAV Colleges* — *Oct 2022 - Mar 2023*
- Mentored **50+** students in academic and technical subjects.
- Developed simplified learning strategies for complex technical topics.

Data Analyst Intern — *May 2024 – Jul 2024*
Snipe Pvt. Ltd.
- Worked on predictive data analysis using machine learning techniques.
- Used statistical and analytical techniques for educational data analysis.
- Developed predictive models for educational data analysis and student performance evaluation.
- Worked with Python, SQL, and data analysis tools for real-world problem solving.

Academic Projects

Credit Card Fraud Detection System | *Python, Scikit-learn, Pandas*
- Developed a machine learning model to detect fraudulent credit card transactions using classification algorithms.
- Trained and evaluated models such as Logistic Regression and Random Forest to improve detection accuracy.
- Achieved high precision and recall, minimizing false positives in fraud detection.
- Used Pandas and NumPy for data analysis and Matplotlib for data visualization.

Library management System| *Java, JDBC, MySQL, OOP, Swing*
- Developed a desktop-based Library Management System using Java and MySQL to automate book and member management.
- Designed and implemented a relational MySQL database to manage books, members, borrowing records, and return transactions.
- Integrated Java with MySQL using JDBC for efficient CRUD (Create, Read, Update, Delete) operations.
- Implemented book issue and return functionality with automatic availability status updates.

Achievements

- Ranked in **top 25** percentile in the Summer Analytics by IIT Guwahati, analyzing large datasets.
- Completed online courses in Python and Machine Learning.
- Delivered technical presentations on DBMS and Machine Learning topics during MCA coursework.

Research Interests

- Database Management Systems
- Data Analytics
- Machine Learning
- Artificial Intelligence
