PROFESSIONAL SUMMARY

Computer Science Engineer with 4+ years of industry experience in software development at Cimpress India and as an Independent Software Engineer. Passionate about teaching Computer Science and mentoring engineering students by combining strong academic fundamentals with real-world software engineering experience. Proficient in Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Web Technologies, and Cloud Computing. Interested in teaching undergraduate engineering students, guiding academic projects, and promoting practical, industry-oriented learning.

TEACHING INTERESTS

- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Software Engineering
- Cloud Computing
- Programming in C/C++

TECHNICAL SKILLS

Programming Languages	C, C++, Java, JavaScript, TypeScript, SQL
Web Technologies	HTML5, CSS3, React.js, Node.js, Express.js
Database Systems	MySQL, PostgreSQL, MongoDB
Cloud Technologies	AWS, Docker, Git, GitLab CI/CD
Software Concepts	OOP, REST APIs, SDLC, Microservices, Distributed Systems
Teaching Subjects	Data Structures, DBMS, Operating Systems, Computer Networks, Software Engineering, Web Technologies, Cloud Computing

EXPERIENCE

Independent Software Engineer April 2025 - Present
Independent *Remote, India*

- Designed and developed a full-stack SaaS Inventory Management System using modern software engineering practices.
- Applied concepts of Object-Oriented Programming, Database Management Systems, RESTful APIs, and Software Design throughout the project lifecycle.
- Developed secure backend services, responsive web interfaces, and modular software architecture suitable as practical case studies for engineering students.
- Prepared technical documentation, reusable components, and maintainable code following industry best practices.
- Continuously explored emerging technologies and strengthened knowledge in full-stack development, cloud computing, and distributed systems.

Software Development Engineer I Aug 2021 - April 2025
Cimpress India *Bengaluru, India*

- Designed and developed scalable enterprise software used in production environments.
- Worked extensively with Data Structures, REST APIs, distributed systems, and cloud technologies to solve real-world engineering problems.
- Collaborated with cross-functional teams through technical discussions, code reviews, documentation, sprint planning, testing, deployment, and production support.
- Participated in knowledge sharing, technical documentation, and software quality improvement initiatives.

EDUCATION

Bachelor of Technology in Computer Science Motilal Nehru National Institute of Technology, Allahabad
GPA: 7.42/10 2017 - 2021

SUBJECTS OF EXPERTISE

- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks
- Software Engineering
- Programming in C, C++
- Web Technologies
- Cloud Computing

LANGUAGES

English Professional Working Proficiency
Hindi Native / Full Professional Proficiency

ACHIEVEMENTS

- Solved **1000+** programming and Data Structures Algorithms problems across LeetCode, GeeksforGeeks, and Coding Ninjas.
- Strong academic foundation in core Computer Science subjects including DBMS, Operating Systems, Computer Networks, and Software Engineering.
- Designed and developed multiple full-stack software applications using modern web technologies.
- Passionate about mentoring students and bridging theoretical concepts with practical industry applications.
